About Me

Software Developer with a broad interest across programming disciplines — tooling, porting, systems-level work, and game development. Self-taught since 2015, mentored by a senior developer with 15+ years in the industry (2K, Electronic Arts, Tuenti, The Game Kitchen).

Experience

UI/UX Developer (Freelance — Brushbolt)

Aug 2024 – Present

- Set up code stylers and Git pre-commit hooks to keep the codebase clean and block unformatted commits.
- Built a tool to scan projects for unused assets, streamlining cleanup and reducing project bloat.
- Developed a gamepad + keyboard UI navigation system, enabling full interface control without a mouse.
- Ported C# tooling to C++ to meet cross-language/engine requirements.
- Designed complex, reusable, cross-platform UI components in pure WPF/XAML with no external dependencies, cutting UI development time.
- Delivered rapid UI prototyping in XAML, reaching iteration speeds comparable to design tools like Figma.
- Recreated and adapted game-inspired UI designs 1:1 using WPF/NoesisGUI (see: UI Cloning project).

Unity C# Tools Developer (Freelance)

Dec 2023 – Aug 2024

- Maintained tools on the Unity Asset Store (5★ average, 14 reviews), ensuring compatibility from Unity 5.x onward.
- Designed and shipped new features for Unity Editor tools for Asset Store publication.
- Used the Unity Profiler to measure and improve runtime performance and load times.
- Wrote tests and debugged issues to ensure tool reliability.
- Optimized code and resolved performance bottlenecks across multiple tools.

Hardware Technician (Freelance)

Jan 2021 – May 2022

- Diagnosed, maintained, and repaired mobile devices, computers, laptops, and consoles.
 - Managed client acquisition and direct communication end-to-end.
 - Provided progress updates and delivered repaired devices to clients.
-

Technical Skills

- Languages & Frameworks: C#, C++, .NET, WPF, XAML, NoesisGUI
- Game Dev: Unity (Editor Extensions, Asset Store publishing, Profiler)
- Tooling & Workflow: Git hooks, code stylers/formatters, C# from | to C++ porting
- Soft Skills: Problem Solving, Self-Management, Client Communication
